

GLOBAL SENSORS NEW ITEM

The Probe that Goes Anywhere

Most probes are a simple solution: you want a temperature reading? Poke the probe shaft where you want it and read the temperature. It is not always that simple. Many times we wish to have a reading hands free or from a location that is not where we are at that time. Enter the waterproof remote probe.

Those days are gone. Now you can have all of the power of a sophisticated IR temperature sensor, but it fits in the palm of your hand. Slip it in your pocket and then it is always ready for a spot check of temperatures.

With the magnet mount, the unit can be mounted on a pot or pan, a refrigerated or freezer wall with no installation step required. Or use the stand or suction cups or some combination.

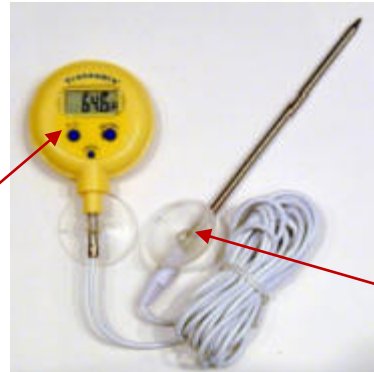

Global Sensors Waterproof Remote Digital Probe Thermometer
\$32.25 each.

Global Sensors Waterproof Remote Probe

The probe lead is very durable and can be routed through the sealing gasket of most refrigerators and freezers.

PS#29

Typical "lollipop" probe display face. Hold button and Max/Min Selection. Switches between °C and °F

Standard 5" long aluminum probe shaft at the end of a 10 foot cable

Hang by clip, suction cup, Velcro®, or magnet (all provided in kit).

- Max/Min function button
- -58° to +572°F (-10° to +300°C)
- 0.1° resolution (°C or °F)
- Accuracy: $\pm 1.0^{\circ}\text{C}$ ($\pm 1.9^{\circ}\text{F}$)
- 3/8" Digits on Display

NIST

Unit is calibrated to NIST traceable source.
Certificate is included.
